\*MBCP matches PG&E's total electricity costs and provides customers with a 5 percent rebate as a credit on their bill for MBCP electric generation charges. The estimated monthly rebate for A-1 TOU customers enrolled in MBChoice is \$4.79866. The estimated monthly rebate for A-1 TOU customers enrolled in MBPrime is \$5.35. This is a bi-annual credit applied in June and December.

\*\*This compares electricity costs for an average commercial customer in the MBCP/PG&E service area (Monterey, San Benito and Santa Cruz counties) with an average monthly usage of 1,102 kilowatt-hours (kWh). This is based on a representative 12-month billing history for all customers on A-1 TOU rate schedules for PG&E's and MBCP's published rates as of 10/7/19.

**Generation Rate** is the cost of creating electricity to power your business. The generation rate varies based on your energy provider and the resources included in your energy provider's generation supply.

**PG&E Delivery Rate** is a charge assessed by PG&E to deliver electricity to your business. The PG&E delivery rate depends on your electricity usage, but is charged equally to both MBCP and PG&E customers.

**PG&E PCIA/FF** represents the Power Charge Indifference Adjustment (PCIA) and the Franchise Fee surcharge (FF). The PCIA is a charge to recover PG&E's above-market costs for generation resources acquired prior to a customer's switch to a third-party electric generation provider, such as MBCP. The PCIA also applies to PG&E customers that elect to take service under PG&E's optional Solar Choice program. PG&E acts as a collection agent for the Franchise Fee surcharge, which is levied by the California Public Utilities Commission (CPUC) on behalf of cities and counties in PG&E's service territory for all customers. The costs for resources included in the PCIA and FF surcharges are included in the generation rate for PG&E bundled service customers.
